

The screenshot displays the Intel VTune Amplifier XE 2016 interface. The main window is titled "Advanced Hotspots Hotspots viewpoint (change)". It shows a table of functions with their CPU time utilization. The "check_match.11" function is highlighted, showing 33.3% effective time by utilization. The "Callers" and "Callees" panels show the function's context. The "Thread" panel shows the thread "quick (TID:...)". The "CPU Time" panel shows the function's CPU time utilization.

Function	Effective Time by Utilization	Spin Time	Over Time	Effective
check_match.11	33.3%	0.0%	0.0%	1.002ms
unmap_vmas	33.3%	0.0%	0.0%	1.002ms
crc16	33.3%	0.0%	0.0%	1.002ms
__memset	0.0%	0.0%	0.0%	0ms
finish_task_switch	0.0%	0.0%	0.0%	0ms
